Introduction

This activity invites you to critically examine student data from your classrooms, focusing on patterns of enrollment, withdrawal, and academic success. The accompanying reflection questions provide a structure to examine and reflect on your classroom data alongside matching institutional data. We hope that this exploration will provide an opportunity to explore basic ways you might use data to enhance your teaching, as well as help ASPIRE develop a better understanding of what dataset types would be most useful for you in your efforts to develop and refine assessment strategies, and ultimately improve student outcomes.

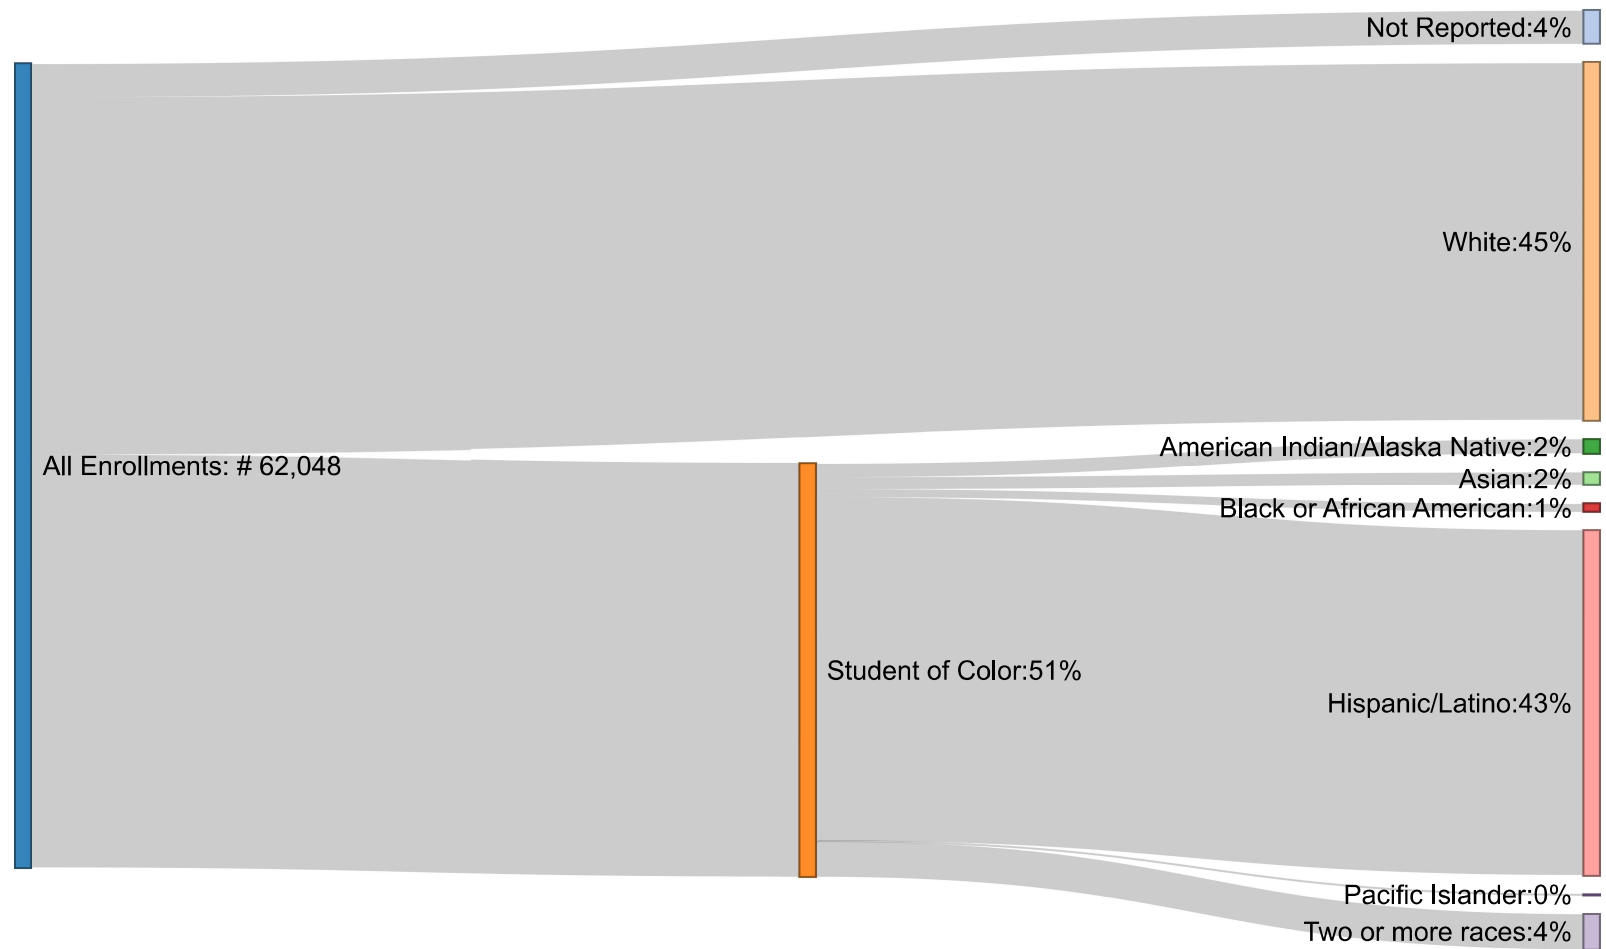

As you work through this report and related activities:

- Consider context. Context matters, so consider the specific context of your course, discipline/program, and the institution when analyzing and interpreting data, particularly grade data.
- Avoid simplistic explanations. Disparities in student outcomes are often complex and multi-faceted, stemming from a confluence of factors. The data you are looking at all comes from your classroom, but is influenced by many things- and those things vary by student.
- Look for patterns and trends. Some of the sample sizes in your data may be very small. Focus your attention on finding patterns and trends within the data, rather than on individual outlier cases.
- Focus on the process. This report was not put together to make anyone feel bad (or good). The report is a tool to support assessment from an instructor-specific center.

Section Two: Who has withdrawn?

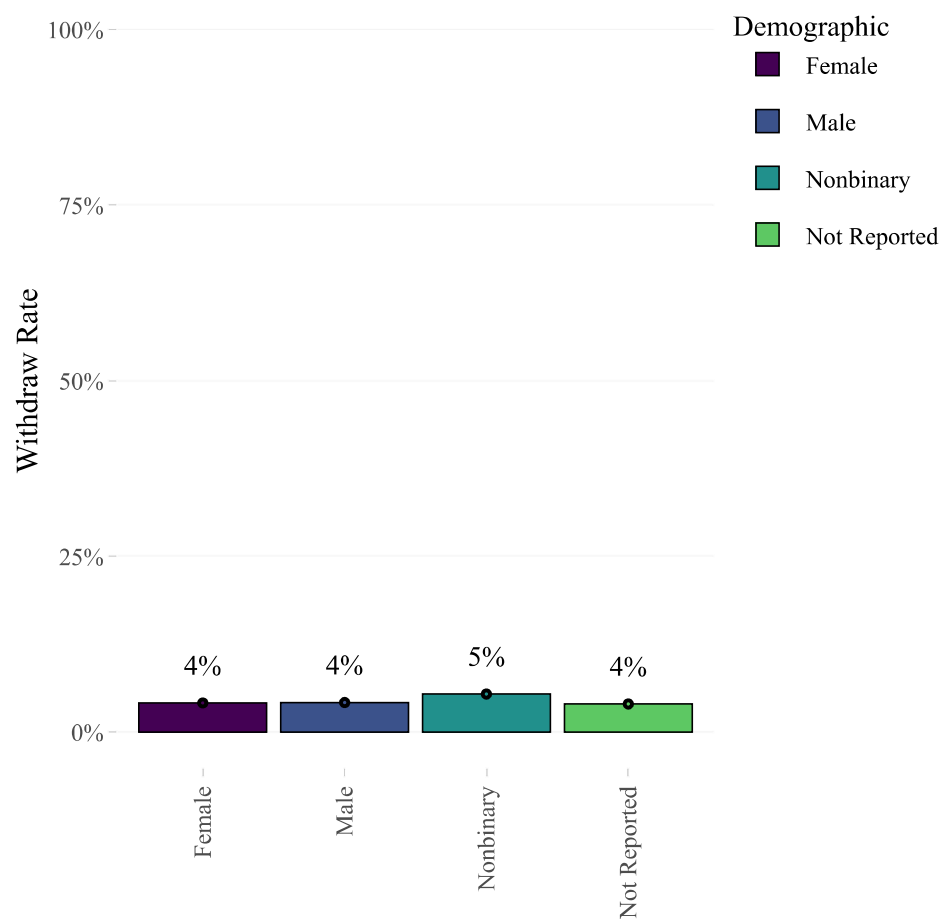

Overall Student Withdrawal Outcomes

Withdrawal Rate by Student of Color Category

Withdrawal Rate by Gender

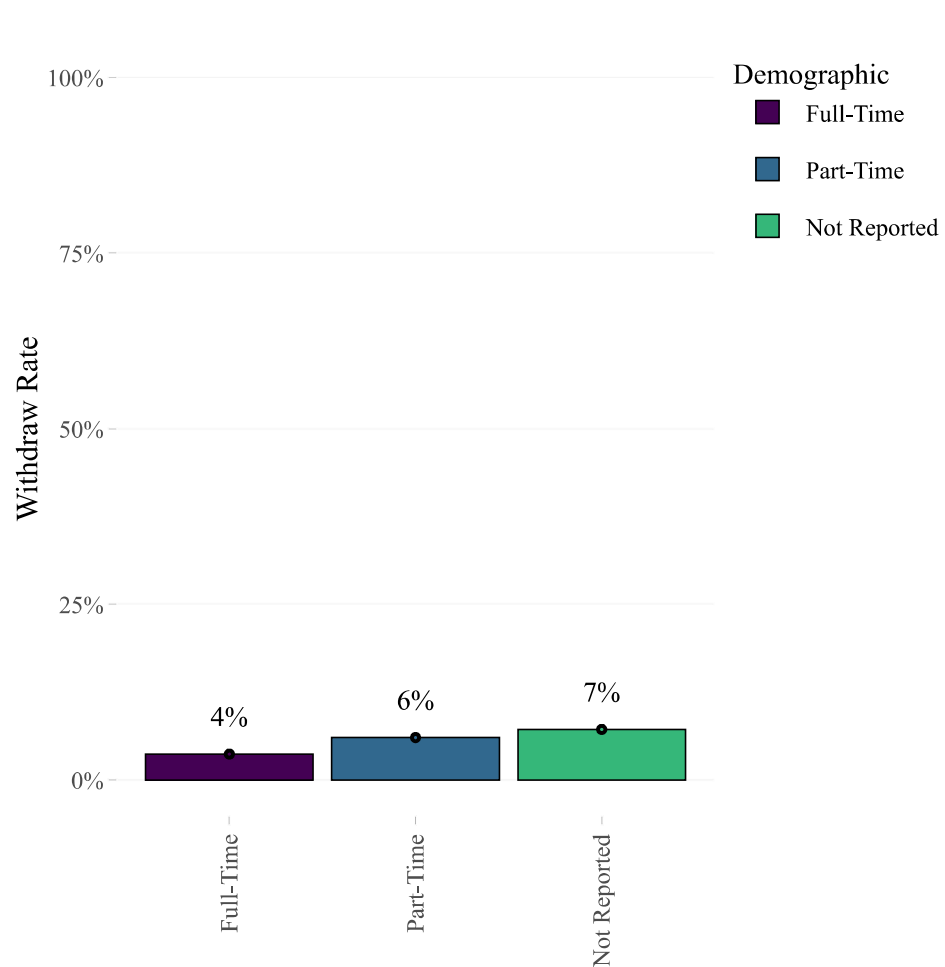

Withdrawals by Gender

The number and *within-category percent** of students who withdrew

Gender	Withdraw Rate	Number of Withdrawals	Total Enrollments
Female	4.2%	1,541	36,982
Male	4.2%	868	20,528
Nonbinary	5.4%	21	386
Not Reported	4.0%	167	4,152

**Within-category percent* (relative percent) represents the percentage out of a specific category rather than out of the overall total, meaning the percentage reflects the proportion of students within that category who withdrew.

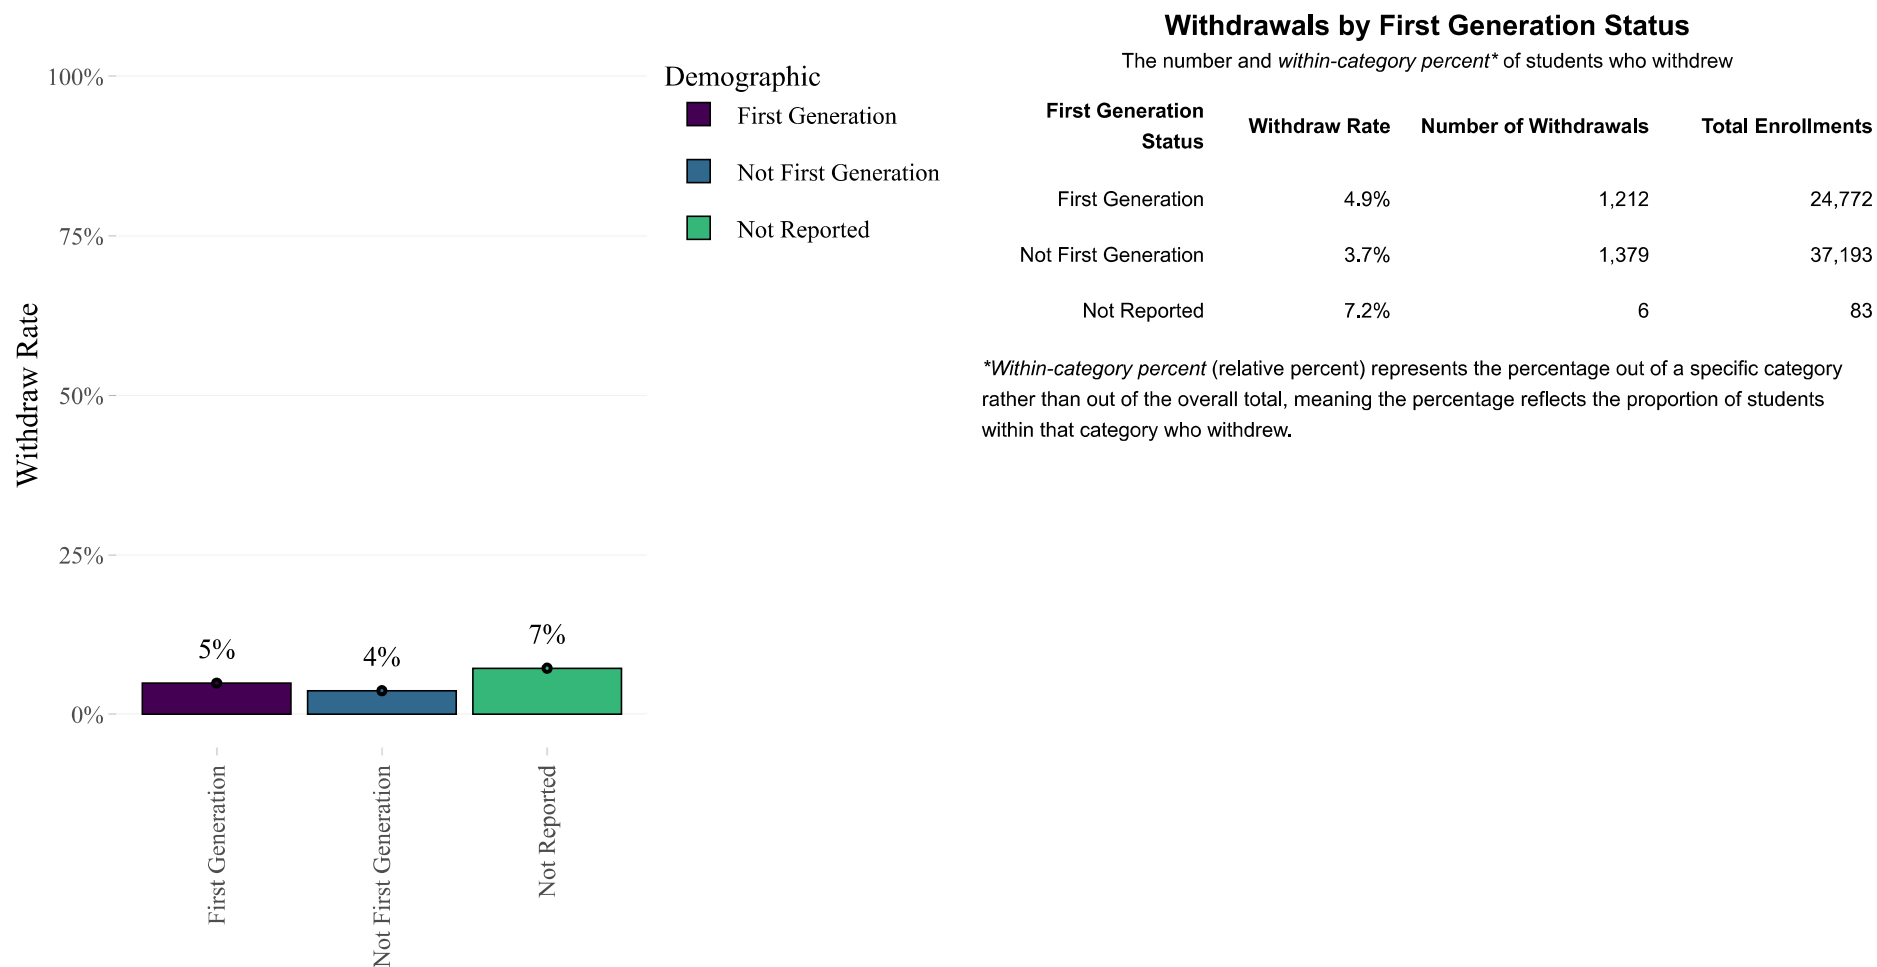

Withdrawal Rate by Full-Time/Part-Time

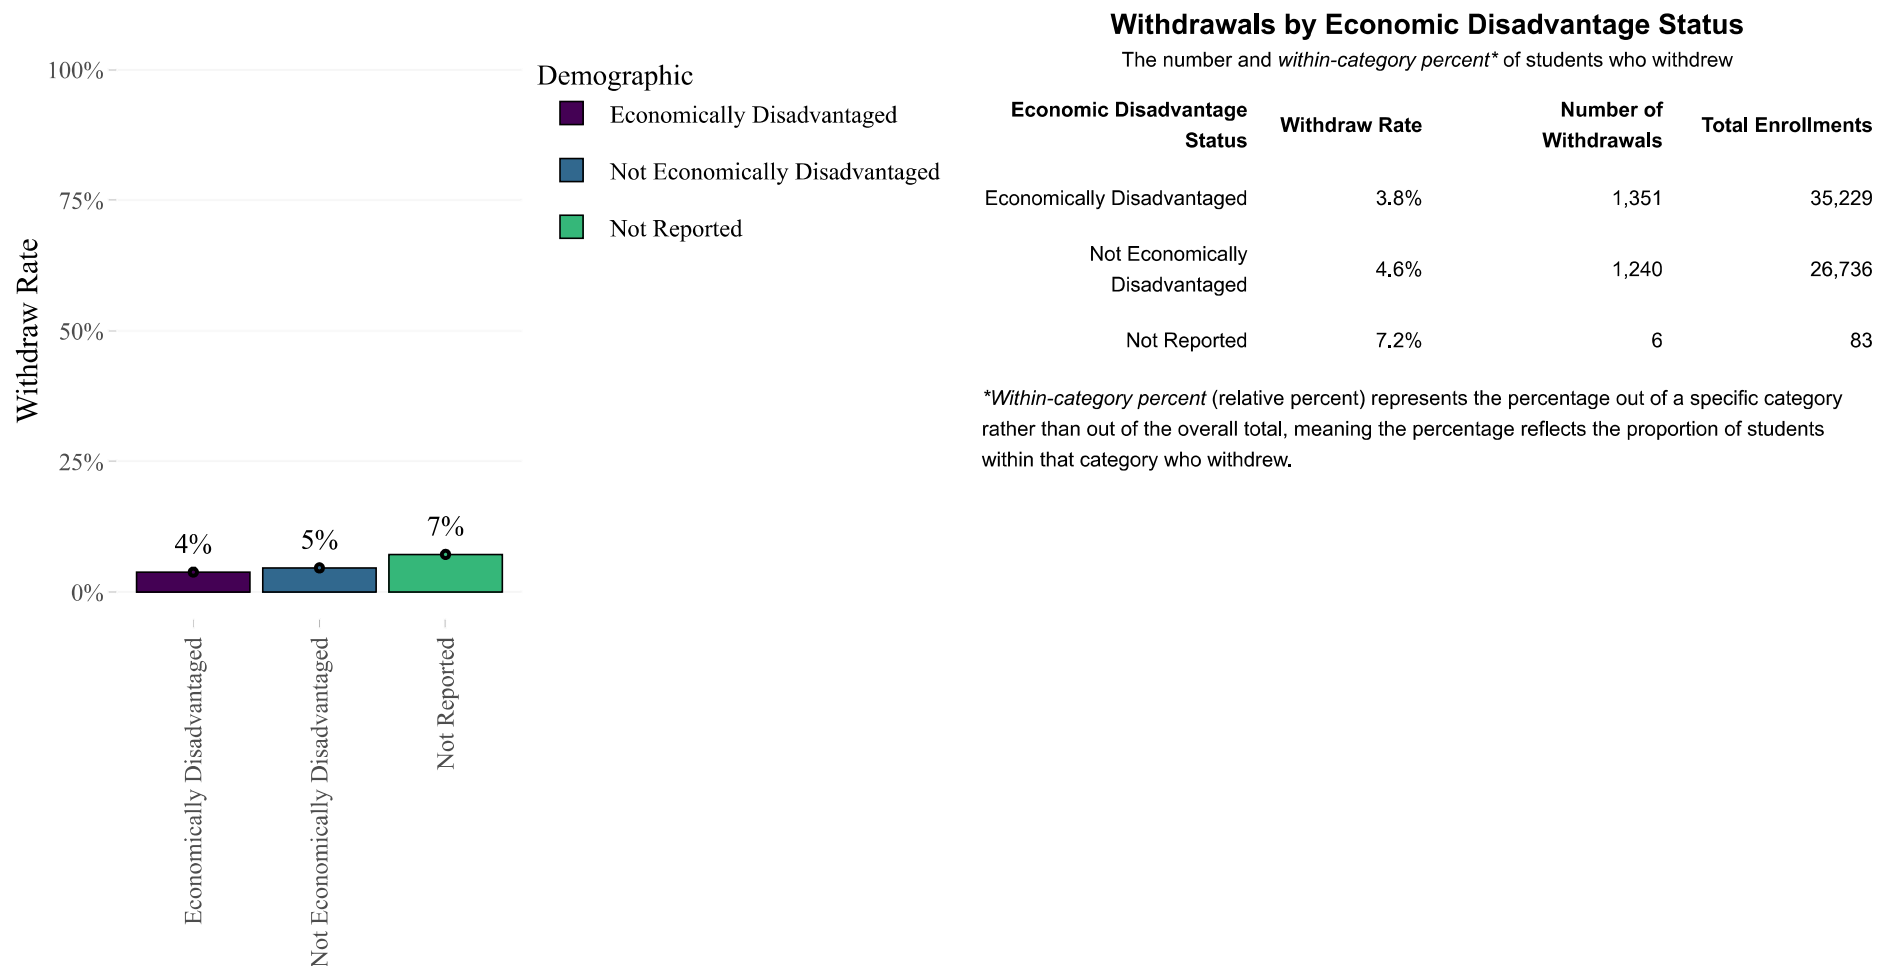

Withdrawals by Full-Time/Part-Time			
The number and <i>within-category percent</i> * of students who withdrew			
Full-Time/Part-Time	Withdraw Rate	Number of Withdrawals	Total Enrollments
Full-Time	3.7%	1,845	49,681
